# MAGIK

- Features**
- Designed with a special vibration proof element, keeping the battery at top performance even on harsh Indian road conditions.
  - Special grid alloy to maximize corrosion resistance, increase cycle life, reduce water consumption and battery durability.
  - Envelope separators from France, that are designed to help eliminate shorting and "corrode through" to improve reliability and battery life.
  - Special ribbed separators slots provide high cranking power and the unique grid design assures maximum conductivity.
  - Special paste formulation: Increases the durability of the plate by reduced aging rate of active material and strong adhesion of active material.
