NEBULA

- Features**
- Advanced tubular technology using state-of-art high pressure spine sasting machines (>150Bar).
 - High corrosion resistant spine alloy using PDC process ensuring super fine grain structure for extra longer life, strength and reliability.
 - Special low antimony alloy ensures very low self discharge thus increasing shelf life, excellent discharge performance with superb deep discharge recovery.
 - DARAMIC (France) PE envelope separator by virtue of high porosity, low electrical resistance and excellent oxidation resistance, serve as a perfect separation medium.
 - Thro' partition ICW process for short electrical path - reduces internal resistance and increases performance.
 - Flat negative plate with special additives and expanders for better charge and discharge cycle.
 - Suitable all types of UPS / H-UPS and Standby applications.
 - Aesthetically designed, compact size to suit home, office and business centers.
 - Readily available factory charged batteries reducing commissioning time and prevents external impurities and improper IFC.
 - Specially designed ceramic vent plugs reduced water topping up frequency to minimum ensuring ultra low maintenance characteristics and environment friendly and free from acid fumes.
 - Attractively designed with superior cosmetics in leak proof and heat sealed tall PP container.
